HTML and CSS Project

Abstract:

Create your first Restaurant website. 😊

Specifications:

- You should have a home, menu, and contact us pages.
- The three pages have the same header and footer.
- The header should have a text or image logo, navigation bar and if you want to have a background image please choose it to look good.
- The footer should have a contact information and the copyright statement.
- The home page contains images of your restaurant and some description.
- The menu page should contain images of the meals and the price in a nice view.
- The contact us page contains the restaurant contact information and a contact form (I expect from you a nice and professional form).
- Don't forget to do the reset CSS.
- **Feel free to add your creativity.**
- Please do some search before you start and visit some restaurant websites.

Proposed methodologies:

Using HTML and CSS.
